BECOME AN APPROVED DOD SKILLBRIDGE (CSP) PROVIDER

PROCESSES FOR COMPANIES AND TRAINING PROVIDERS

APPLY AT DODSKILLBRIDGE.COM

All the information you need to apply is located on the Industry Partner pages. Be prepared to outline the details of your program including positions and training plans! Approval at the DOD level is the first step in accepting participants from all services. The online approval form is user-friendly and you can reach out to the program office anytime you need additional assistance.

WHAT'S NEXT?

Once you're an approved DOD Provider, you'll be listed on the DOD SkillBridge website and interested servicemembers will start reaching out to you! Once you screen and accept a candidate, the next step is getting approval from the servicemember's chain of command - the servicemember will initiate this and you will provide supporting documentation as required. Check out the info below for an idea of what you can expect depending on your candidate's branch of service.

APPROVAL - US ARMY

Each Installation has its own CSP provider approval process. You'll work closely with an Installation Transition Program Representative to become approved as a Provider at the Installation level, and start welcoming Soldiers to your company!

APPROVAL - US NAVY/US MARINE CORPS

Good news! Once you are approved as a Provider at the DOD level, no further company vetting is required for USN/USMC. Sailors and Marines will submit their approval request through their chain of command to participate with your company.

APPROVAL - US AIR FORCE

USAF members interested in your program will submit a Vetting Checklist to their chain of command via their Base Education Services Officer. You will work with the member and ESO to document your company's program and individual training plan to receive approval.
